Allowable Subject Matter

1. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's arguments, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art of record teaches providing web services including advertising of services thus provided.

However, the prior art of record fails to teach or suggest individually or in combination a system or method in which the Web Services endpoint comprises an interface for advertising a push service of the Web Services endpoint. That is, the prior art fails to teach that the web services endpoint creates an advertisement of its own push service. The Examiner finds the applicant's arguments on page 12, lines 6-19 of the amendment filed March 9, 2007 to be persuasive. The applicant argued in substance that the prior art of record does not teach or suggest advertising a push service or an interface that allows for advertisement of a service of the Web Services endpoint. "Rather, the [prior art cited] teach that a node allows service providers to create online descriptions of available services including tariffs and subscription fees. Thus, [the prior art of record] teaches that the service providers, not the access node (asserted as corresponding to the claimed endpoint), create online descriptions of services offered by the service providers and not a description or advertisement of a push service of the access node." See Remarks/Arguments, page 12, lines 13-19.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
